

Covinga

The single-sided adhesive high-performance tape is ideal for permanently sealing window and door frames airtight. The already removed separating strip and the precise pre-folding make application quick and easy. Suitable for indoor and outdoor areas and for various substrates such as wood and hard wood-based panels, gypsum fiber and plasterboard, painted wood/hard plastic and corrosion-protected metal. It can also be used on smooth vapor barriers and facade membranes.

Technical specifications

PROPERTY	VALUE	TEST
carrier system	polypropylene fleece with special coating	
pressure sensitive adhesive	modified dispersion acrylate	DIN EN 1849/2
cover	tear-resistant foil liner white	
roll width	60 mm (12/48 or 30/30)	
roll length	25 m	
processing temperature	-5°C to +40°C	
temperature resistance	-40°C to +90°C	
peel strength	fulfills	DIN 4108-11
peel strength after aging	fulfills	DIN 4108-11
suitability as a material for temporary cover	3 months	
storage	unlimited	
prerequisite for safe use	The adhesive surface must be free of grease and dust, dry and must not be adhesive-repellent. To be sure, we recommend adhesive tests.	

These values may have tolerances. Unless otherwise stated, industry standard, material and performance tolerances apply.
